SUMMARY

Software Engineering student at Adventist University of Central Africa (AUCA) with 3 years of practical experience in software development and information technology. Experienced in developing web and database-driven applications using PHP, JavaScript, SQL, Oracle, and PL/SQL.

Strong practical background in database development, Linux and Windows systems, computer networking, virtualization, and cybersecurity. Experienced with technologies including Wazuh, Suricata, pfSense, Active Directory, VirtualBox, and Cisco Packet Tracer.

Passionate about developing reliable, secure, and practical software solutions while continuously expanding technical skills.

EDUCATION

Adventist University of Central Africa (AUCA)

Rwanda

Bachelor's Degree in Software Engineering, Relevant Coursework: Software Engineering, Database Development with PL/SQL, Computer Networking, Network Operations, Linux & UNIX Systems, Computer Maintenance, Cybersecurity *Currently pursuing*

EXPERIENCE

Software Development & IT

3 Years of Practical Experience

- Developed web-based and database-driven applications using PHP, HTML, CSS, JavaScript, and SQL.
- Designed relational databases and implemented business logic using Oracle PL/SQL.
- Developed stored procedures, functions, packages, and exception-handling mechanisms.
- Built and tested software projects involving data management and automated workflows.
- Configured and administered Linux and Windows-based systems.
- Designed and configured virtualized network environments using VirtualBox.
- Configured pfSense firewall, gateway, network interfaces, firewall rules, and DHCP services.
- Worked with Windows Server and Active Directory.
- Designed and tested enterprise networks using Cisco Packet Tracer.
- Implemented security monitoring using Wazuh SIEM and Suricata IDS.
- Performed network troubleshooting, connectivity testing, and security monitoring.

PROJECTS

Digital Health Lab Management with Privacy & Access Controls | A database management system designed to support laboratory operations while improving privacy and access monitoring.

- Oracle Database | SQL | PL/SQL
- Laboratory test request management
- Sample tracking
- Result management and validation
- Automated abnormal-value alerts
- PL/SQL packages and exception handling
- Privacy and access controls
- Automated database workflows

Enterprise Network & Security Infrastructure | Designed and implemented a virtualized enterprise network environment.

- pfSense | Wazuh | Suricata | Linux | Windows Server | VirtualBox
- pfSense firewall and gateway
- Multiple LAN segments
- DHCP services
- Windows Server / Active Directory
- Ubuntu Linux Server
- Wazuh SIEM
- Suricata IDS
- Remote Syslog
- Firewall access-control rules
- Network monitoring and security testing

Employee Pension Management System | Developed a web-based system for managing employee pension information, including database integration, information management, and data retrieval.

- PHP | HTML | CSS | JavaScript | SQL

Customer Relationship Management (CRM) System | Developed a web-based CRM application for managing customer information and business-related operations.

- PHP | HTML | CSS | JavaScript | SQL

TECHNICAL SKILLS

Programming & Web Development: PHP, JavaScript, HTML5, CSS3, C

Databases: Oracle Database, SQL, PL/SQL, Database Design, Stored Procedures & Functions, PL/SQL Packages, Exception Handling

Networking & Systems: Cisco Packet Tracer, TCP/IP, VLANs, DHCP, DNS, Routing & Switching, Linux / Ubuntu, Windows Server, Active Directory, VirtualBox, pfSense

Cybersecurity: Wazuh SIEM, Suricata IDS, Firewall Configuration, Access Control, Security Monitoring, Remote Syslog

Tools: Git, GitHub, Visual Studio Code, Oracle Development Tools

Soft Skills: Problem Solving, Critical Thinking, Teamwork, Communication, Technical Troubleshooting, Time Management, Adaptability, Continuous Learning, Attention to Detail
